Mokshith Balidi

Software Engineer | Distributed Systems, Cloud & Backend Engineering
Hyderabad, India | +91 63002 83558 | mokshithbalidi@gmail.com
LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineer with hands-on experience designing, developing, testing, and deploying **cloud-native backend services, microservice architectures, and AI-driven systems**. Built **20+ independently deployable services** on GCP and engineered reliable workflows with persistent state, retries, and failure recovery. Currently delivering **end-to-end agentic AI solutions** as a Forward Deployed Engineer at Lyzr AI. Proficient in **Python, REST APIs, Docker, GCP, SDLC practices, and production debugging**, with experience taking projects from architecture to deployment.

Technical Skills

Programming: Python, JavaScript, TypeScript, SQL
Backend & System Design: FastAPI, Node.js, Express.js, REST APIs, Microservices, Distributed Services, Concurrent Processing, Design Patterns
Cloud & DevOps: GCP (Cloud Run, Compute Engine), Docker, Linux, CI/CD, Service Deployment, Health Checks
Data & Reliability: MongoDB, Redis, MySQL, Retry & Fallback Strategies, Failure Recovery, Debugging, API Testing
AI & Engineering Tools: LangGraph, LangChain, RAG, LLM Evaluation, Git, GitHub, Postman, Playwright, Selenium, Cypress, Appium
Frontend: React, Next.js, Tailwind CSS

Experience

Lyzr AI | **Forward Deployed Engineer – Agentic AI** Banglore, India | 28 Sep 2026 – Present

- Own **end-to-end development of agentic AI solutions**, from understanding requirements and designing workflows to implementation, integration, testing, and delivery.
- Build and iterate on agent-based application workflows, connecting AI capabilities with APIs, tools, and application services to address real-world use cases.
- Debug cross-component issues and refine solution behavior with an emphasis on reliable execution, maintainability, and production readiness.

Deloitte India | **Software Developer Intern – GenAI & RAG** Hyderabad, India | Jul 2025 – Feb 2026

- Built an enterprise **semantic-search and retrieval system** for large software test repositories, reducing manual test-case discovery time by approximately **70–80%**.
- Developed the retrieval pipeline covering data ingestion, preprocessing, embeddings, relevance filtering, context construction, and LLM-assisted generation.
- Integrated retrieval with downstream automation, assessed result quality, and improved workflows through iterative testing and debugging.

Innovat.tech | **Software Developer & ML Intern** Hyderabad, India | Oct 2024 – Nov 2024

- Built Python data-processing pipelines and forecasting models with **LSTM and XGBoost** across **10+ financial-market indicators**.
- Improved baseline predictive accuracy by **18.25%** through feature engineering, indicator integration, and systematic model tuning.

Selected Projects

Cloud-Native Property Management Platform *Python, FastAPI, Docker, GCP Cloud Run, REST APIs*

- Architected and deployed **20+ independently deployable microservices** for property, tenant, maintenance, media, geographic, and access-control workflows.
- Built RESTful backend services with containerized deployments, environment configuration, health checks, and inter-service communication on **GCP Cloud Run**.
- Diagnosed deployment and runtime failures involving authentication, ports, quotas, region configuration, and distributed service connectivity.

Enterprise AI Test Automation Platform *Python, FastAPI, MongoDB, Redis, Playwright, Appium*

- Independently designed and developed an AI-powered testing platform that converts requirements into **structured test cases and executable scripts** for web, mobile, and desktop environments.
- Engineered execution workflows with **persistent state, staged retries, bounded repair, failure isolation, and verifier-gated re-execution**.
- Presented the platform to **8 QA organizations**, discussing architecture, tradeoffs, implementation, and proof-of-concept opportunities.

ApnaWEB – Automated Website Generation Platform *Python, Gemini, Apps Script, Google Sheets*

- Built an automated ingestion, generation, templating, and publishing pipeline that delivered personalized portfolio websites and resumes to **150+ users**.

Education

Chaitanya Bharathi Institute of Technology Hyderabad, India
Bachelor of Engineering in Information Technology | Oct 2022 – May 2026 | CGPA: **8.3/10**

Publication

Failure-Aware Prompt Refinement for Automated Unit Test Generation with Large Language Models | Presented at **ICTMSD 2026**.
