Mokshith Balidi

Forward Deployed AI Engineer | AI Agents, RAG & Production Systems
Hyderabad, India | +91 63002 83558 | mokshithbalidi@gmail.com
LinkedIn | GitHub | Portfolio

Professional Summary

AI and Software Engineer experienced in building **LLM-powered automation, RAG systems, tool-driven workflows, and production backend services**. Built enterprise AI systems spanning retrieval, structured generation, execution, validation, failure recovery, and reporting, and independently developed an AI automation platform demonstrated to **8 QA organizations**. Strong in **Python, FastAPI, LangGraph, React, MongoDB, Redis, and cloud infrastructure**, with a focus on rapid prototyping, evaluation, reliability, and production deployment.

Technical Skills

AI & Agents: Prompt Engineering, RAG, Semantic Search, LangGraph, LangChain, LLM Evaluation, Graph Engineering, Agent Design and Scaling

Backend & APIs: Python, FastAPI, Node.js, Express.js, REST APIs, Microservices, Webhooks, Concurrent Processing

Production AI: RAGAS, DeepEval, AI Security, Retry & Fallback Strategies, Failure Recovery, Observability

Databases & Cloud: MongoDB, Redis, MySQL, GCP, Cloud Run, Compute Engine, Docker, Linux, CI/CD

Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS, Bootstrap

Testing & Tools: Playwright, Selenium, Cypress, Appium, Git, GitHub, Postman, ThunderClient

Experience

Deloitte India | **Software Developer Intern – GenAI & RAG** Hyderabad, India | Jul 2025 – Feb 2026

- Built an enterprise **semantic-search and RAG system** across large software test repositories, reducing manual test-case discovery time by approximately **70–80%**.
- Engineered the full retrieval workflow spanning ingestion, preprocessing, embeddings, semantic retrieval, relevance filtering, context construction, and LLM-assisted generation.
- Integrated retrieval into downstream automation and evaluated relevance using source context and candidate quality to iteratively improve results across enterprise repositories.

Innovat.tech | **Software Developer & ML Intern** Hyderabad, India | Oct 2024 – Nov 2024

- Developed time-series data pipelines and forecasting models using **Python, LSTM, and XGBoost** across more than **10 financial-market indicators**.
- Improved baseline predictive accuracy by **18.25%** through feature engineering, technical-indicator integration, and systematic hyperparameter tuning.

Selected Projects

Enterprise AI Test Automation Platform *Python, FastAPI, MongoDB, Redis, LLMs, Playwright, Appium*

- Independently built an end-to-end AI automation platform that transforms software requirements into **structured test cases and executable scripts** across web, mobile, and desktop environments.
- Engineered multi-stage AI workflows for execution, failure isolation, staged retries, bounded repair, verifier-gated re-execution, persistent state, and CI/CD reporting.
- Demonstrated the platform to **8 QA organizations**, explaining architecture, tradeoffs, and deployment workflows and progressing into multiple proof-of-concept discussions.

Cloud-Native Property Management Platform *GCP, Cloud Run, Python, FastAPI, Docker, REST APIs*

- Designed and deployed **20+ independently deployable backend services** supporting property, tenant, maintenance, media, geographic, and access-control workflows.
- Built scalable REST services on GCP Cloud Run and managed multi-region deployment, health checks, environment configuration, and service-to-service communication.
- Debugged production issues involving authentication, container ports, quotas, regional deployment, configuration, and distributed service connectivity.

ApnaWEB – Automated Website Generation Platform *Python, Gemini, Apps Script, Google Sheets*

- Built an AI-powered workflow that converts structured user inputs into personalized portfolio websites and resumes through automated generation and publishing.
- Designed the ingestion, generation, templating, and deployment pipeline, delivering personalized assets to more than **150 users**.

Education

Chaitanya Bharathi Institute of Technology Hyderabad, India
Bachelor of Engineering in Information Technology | Oct 2022 – May 2026 | CGPA: **8.3/10**

Publication

Failure-Aware Prompt Refinement for Automated Unit Test Generation with Large Language Models
Presented at **ICTMSD 2026**.
